CLEANING INSTRUCTIONS

Fabric
It is recommended to vacuum the fabric regularly and to use non-abrasive textile cleaners for the gentle removal of any stains.

Leather
To prevent fingerprint marks, always handle items while wearing gloves. If the leather item presents stains or dirt, first remove any loose debris using a dry, soft-bristled brush. Then, use a lightly dampened cloth with distilled or bottled water to clean the surface. Ensure that cleaning is performed with smooth, continuous motions across the entire surface, avoiding excessive focus on any single area to maintain a uniform appearance.

Please note:
Natural materials will come with peculiarities and develop a characteristic patina over time.
